

Eastern Economic Corridor of Digital (EECd)

The Future is here!

In the 21st century, technological advances, especially digital technology, make a world without borders or narrow the globe. It has 193 countries worldwide with seven continents and a 9.7 billion population. Every country has the opportunity to be a new player in the new global economy.

The Southeast Asia (SEA) region is part of the Asia continent that has 11 countries with 681,323,552 consumers in the market. Not only has the number of

residents been rising, but the growth in SEA continues to outpace that of others, making the region an emerging economic powerhouse of the era.

Thailand is the prime gateway to SEA.

We are the critical geographical gateway to one of the most prosperous regions in the world. In the past decades, Thailand has been the manufacturing and service center for world-leading investors from various industries, such as agriculture, automotive, electronics, food, medical, petrochemical, and tourism.

The Thai Government has seen significant changes in the global economy.

They have been developing the critical and digital infrastructures to enable Thailand to become the future SEA Business/Living Hub. They established the public agency called the Eastern Economic Corridor Office of Thailand (EEC). EEC aims to encourage investment, uplift innovation, and advance technology in Thailand to support the new global economy.

The Eastern Economic Corridor of Digital (EECd) is one of the EEC's special promotional zones dedicated to Digital.

EECd has 211 acres in a prime location of Sriracha, Chonburi province. EECd aims to be the center of digital industry investment and a smart city in a green urban area with international standard facilities. EECd serves as the playground and, specifically, the regulatory sandbox to nurture and promote the digital industry ecosystem and future investments. EECd comprises world-class Data Centers, Digital Innovation Testbeds, Standards Institutes fully equipped with High-Tech and Renewable Energy Facilities, and a Business/Living Ecosystem.

Prime Location in EEC Area

EEC covers an area of three provinces, namely Chachoengsao, Chonburi, and Rayong Province.

For the EEC Business/Living Ecosystem,

it can support the investors with a One-Stop-Service (OSS) through the EEC Workspace System (EEC-OSS, Etc.). The investors can enhance their online management of various business aspects in Thailand and the SEA market without needing local partners.

Please visit our Business/Living Ecosystem website at www.eecoss.com to learn more about how we can help support your business expansion to Thailand and Southeast Asia (SEA).

EECd Your Success is our Success.
